

Environmental Sustainability	Standard:
	Page: 1 of 1
	Issue: 05
Policy Statement	Effective from: 05/01/2026
	Prepared by: Sarah Richmond
	Approved by: Steve Lamb

Abacus Lighting Ltd. recognises that its business activities impact both directly and indirectly on the environment.

The business is committed to significantly reducing its impact on the planet through the prevention, reduction, and mitigation of its use of natural resources and its production of waste and pollution.

To achieve its environmental sustainability objectives the business is committed to:

- comply with all applicable environmental legal and other requirements
- continually improve its environmental management systems
- reduce the use of energy and other resources
- develop low energy LED lighting products
- use recycled materials in manufacturing wherever possible
- reduce all forms of business travel where possible
- encourage the use of electric company cars where practical
- use well maintained, energy efficient, low emission company vehicle for operational activities
- replace existing lighting in our manufacturing and administration areas with LED lighting
- reduce our electricity consumption with use of the IESCO Power Optimisation System
- encourage the use of electronic files to reduce paper usage
- employee involvement via the establishment of an Environmental Committee

The business recognises that it is not yet able to eliminate its carbon footprint and so mitigates this by:

- purchasing carbon credits from the airline at point of booking, where possible, to offset its business air travel
- purchasing carbon credits from Oblong Trees to offset its gas, electricity, and vehicle usage.
